Summary

I am a software engineer with several years of experience in *front-end development* and *JavaScript*, currently working at **Example Corp**. I care about the interfaces people touch and about architecting resilient systems.

Experience

Example Corp

SOFTWARE DEVELOPMENT ENGINEER - FRONT END

Anytown, USA
Aug. 2016 - Present

- Working on a care-intelligence platform; part of the product team focused on new features, scalability, and release cycles.
- Built a dashboard-builder framework with widgets, layouts, and filters for data visualization.
- Initiated a **micro-frontend** architecture, moving modules to independent packages on a private registry.

Freelance

WEB DEVELOPER

Anytown, USA
Oct. 2015 - Aug. 2016

- Built server-rendered single-page apps on top of Express with SEO-friendly rendering.
